

Ventilation for critically ill patients: Weaning strategies

Pre-Congress Workshop for the 2019 Annual Scientific Congress of Malaysian Society of Anaesthesiologists and College of Anaesthesiologist, Malaysia

Thursday 4th July 2019 at Ipoh Convention Centre

Guest speakers (Faculties): Dr Asoka Gunaratne, Dr Ismail Tan, AProf Dr Rafidah Atan, Dr Azarinah Izaham

Facilitator: AProf Raha Abd Rahman, and representatives from Hamilton, Puritan Bennet, Maquet, & Phillips/Respironic.

This workshop aims to discuss on common problems faced during weaning of critically ill patients from mechanical ventilation. Various different pathophysiologies may affect the weaning process. Experienced intensivists will discuss on 4 main issues which commonly faced in our intensive care units (ICU). During the hands-on sessions participants will have the opportunity to discuss with our experts on the various ventilation modes available in different types of ventilators frequently used in the ICU.

Program:
